Sniffing Attack using Wireshark

Procedures:

I started Wireshark

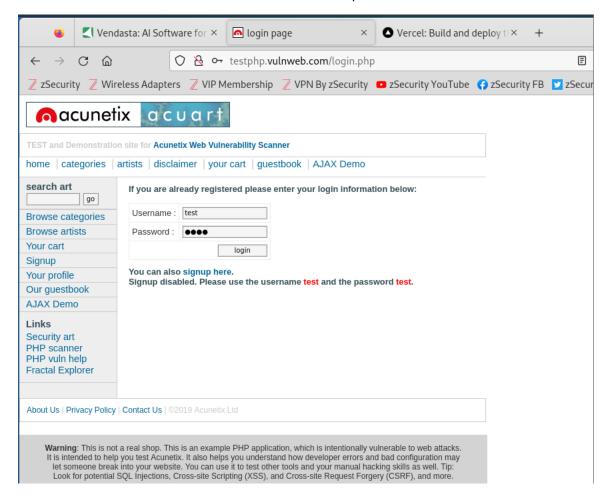

```
root@kali: ~ x root@kali: ~

root@kali: ~ x root@kali: ~

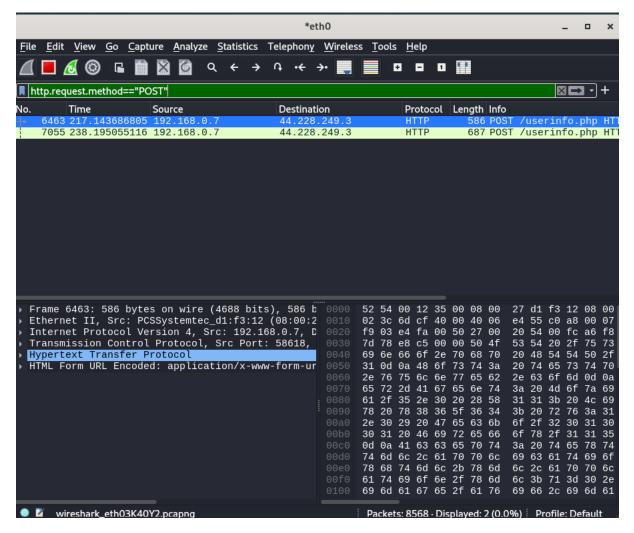

root@kali: ~ x root@kali: ~

root@kali: ~
```

I entered the credentials on the website username=test password=test

On Wireshark I used the filter http.request.method=="POST"

Retrieved the username & password

```
→ HTML Form URL Encoded: application/x-www-form-u
→ Form item: "uname" = "test"
→ Form item: "pass" = "test"
